### **LISTING OF THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Claim 1 (currently amended)** A speaker damper, comprising a damper casing and a metallic whisker, wherein the damper casing is a woven pad formed as a circular wafer with corrugated sections which are corrugated so as to have peak segments and valley segments; and the metallic whisker intermittently penetrates through the damper casing between a first surface and a second surface of said damper casing, an intermittent air space between the whisker and the damper casing, and a fastening string attaching the whisker at the air space location and is held by a fastening string at at least one of said peak and valley segments.

**Claim 2 (previously presented)** The speaker damper according to claim 1, wherein a fixing binder is applied to secure said fastening string to said at least one of said peak and valley segments.

**Claim 3 (previously presented)** The speaker damper according to claim 2, wherein said fixing binder is also applied to secure said fastening string to said metallic whisker.

**Claim 4 (previously presented)** The speaker damper according to claim 1, wherein said metallic whisker is held by respective said fastening strings to a plurality of said peak segments.

**Claim 5 (previously presented)** The speaker damper according to claim 4, wherein a fixing binder is applied to secure each of said fastening strings to the corresponding said peak segment and to said metallic whisker.

**Claim 6 (previously presented)** The speaker damper according to claim 1, wherein said metallic whisker is held by respective said fastening strings to a plurality of said valley segments.

**Claim 7 (previously presented)** The speaker damper according to claim 6, wherein a fixing binder is applied to secure each of said fastening strings to the corresponding said valley segment and to said metallic whisker.
